## Introduction:

This is a smart solar charge controller which has advanced MPPTtechnology .Solar charge controller is one of the important parts in theoff-grid solar system. For having the advanced MPPT technology, the controllercan trace the peak power with 99% conversion efficiency. MPPT microprocessor, inside the controller[making 30% more charge current withsignificantly less power than tradition. In addition to this, easier installingand supporting to expand volume are other advantages. It can also store energyto different kinds of batteries. We provide battery choice(Vented[]Sealed[]Gel[]NiCd).
