

MPPT Controller eSmart-50A

MPPT Controller eSmart-50A is a high-efficiency solar charge controller designed for use with PV systems. It features a large LCD display and two buttons (SELECT and CONFIRM) for easy operation. The controller is compatible with PV Voc up to 150V and offers multiple output voltage options: 12V, 24V, 36V, and 48V Auto. It supports power ratings of 650W/12V, 1300W/24V, 1950W/36V, and 2600W/48V. The controller is built with a robust red and black casing for durability and protection against environmental factors.
