12V/24V/24V solar charge controller 20a with competitive price mppt solar charge controller I-panda

Introduction

This e-SMART MPPT (maximum Power Point Tracking) <u>solar charge controller</u> is a smart solar controller with automatic recognition function, smart charging and discharging function, three stages charging function to protect battery. It can increase 30%~60% efficiency than traditional PWM controller. It supports many kinds of batteries. It also have RS232 Communication function.

Features

- 1. MPPT charging mode, <u>peak efficiency up to 99%</u>, saving 30%~60% solar panel than traditional PWM controller.
- 2. DC12V/24V/48V battery system automatic recognition, users can use it in different system conveniently.
- 3. Maximum PV input voltage up to DC100V.
- 4. Three stages charge: fast charge(MPPT), constant voltage charge, floating charge, It can protect batteries well.
- 5. Three option of discharge: on mode and off mode and PV voltage(solar) control mode.
- 6. Users can choose 4 kinds of commonly standard batteries(Sealed lead acid, Vented, Gel, NiCd). Other kinds of batteries can be defined by users.
- 7. Digital tube can display battery voltage and charging current. The software can display various parameters such as model number, PV input voltage, battery type, battery voltage, charging current, charging power, working condition.
- 8. RS232 communication, we can offer communication protocol also, it's convenient for user's integration management.
- 9. This controller can be paralleled infinitely.
- 10.<u>CE and RoHS Certifications</u> are approved. We can help clients to approve other certifications.
- 11. 2 years warranty; 3~10 years extended technical service.

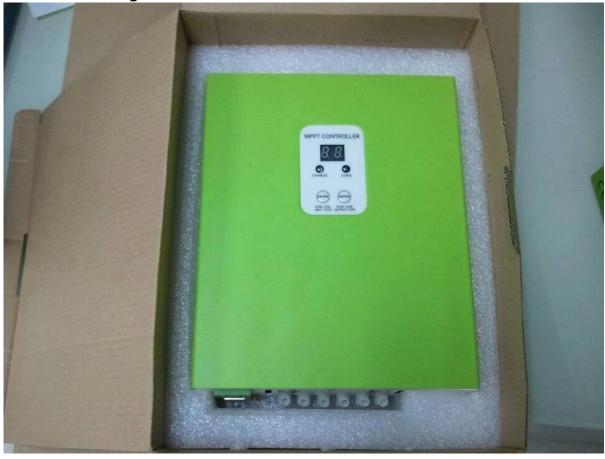

Parameters

Noise	≤40dB	
Thermal heat-dissipating method	Itself cooling	Fan cooling
Components	Imported material With EU sta	ındards.
Certification	CE\FCC\RoHS	
Physical		
Measurement D x W x H(mm)	205*168*60	
package size D x W x H(mm)	265*196*110	
N.G(KG)	1.8kg	
G.N(KG)	2kg	
Mechanical Protection	IP25	
Environment		
Humidity	$0\sim90$ %RH (no condense)	
Altitude	0~3000m	
Operating Temperature	-20℃ ~ +50℃	
Storage Temperature	-40℃ ~ +75℃	
Atmospheric Pressure	70~106kPa	

Products Package

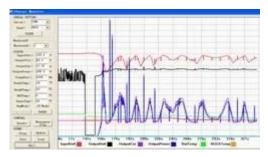

Communication function and PC software

1. The first picture show solar controller working status(charge and discharge), PV voltage, charge voltage,

charge current etc. Users can choose the type of the batteries, DC-load output control method.

2. We provide PC upper software. Testing software is not including. (user's PC has software development platform, if needed, please apply for it)

Information display and parameter setting

- 1. ENTER1 button: press left ENTER1 show 2 digital battery voltage if it is charging, then shows 2 digital charge voltage), for example, the battery voltage or charge voltage is 13.5V, it shows13, please see Figure 2.1; Press ENTER1 a little bit longer, users can set battery types.
- 2. ENTER2 button: press right ENTER2 show 2 digital battery current (if it is not charging, then it display 00, if the charge current is 22.5A, then it shows 22,please see Figure 2.2); press ENTER2 button a little bit longer, DC load control can be set (On mode, Off mode, PV voltage control mode) Please see more details in the user manual.

Applications home use solar system

Solar street lighting system
