The ESMART3 series is the third generation ESMART MPPT controller. Considering the characteristics of the second generation, the following points are optimized:

1.Increase all kinds of protection function to be used more reassuring.

2.Add the LOAD sampling to be used more clear of output load.

3.Wider PV Input voltage than eSmart2, so it suitable for more kinds of PV modules

4. Reduce the static standby self-consumption, energy saving and more simply for small system.

Choose eSmart3, more intelligent in life!

Features:

1.It has an efficient MPPT algorithm, MPPT efficiency \geq 99.5% and converter efficiency up to 98%.

2.Charge mode: three stages (constant current, constant voltage, floating charge), it prolongs service life of the batteries.

3.Four types of load mode selection: ON/OFF, PV voltage control, Dual Time control, PV+Time control .

4.Battery system voltage automatic recognition.

5. Three kinds of commonly used lead-acid battery (Seal\Gel\Flooded) parameter settings fcan be selected by the user, and the user can also customize the parameters for other battery charging.

6.It has a current limiting charging function. When the power of PV is too large, the controller automatically keeps the charging power, and the charging current will not exceed the rated value.

7. High definition LCD display function to check the device running data and working status, also can support modify the controller display parameter.

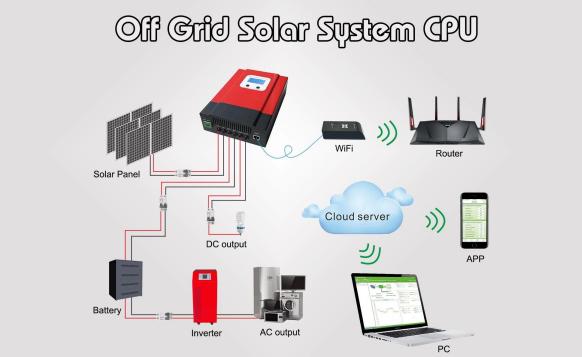

8.RS485 communication, we can offer communication protocol to convenient user's integrated management and secondary development.

9.Support PC software monitoring and WiFi module to realize APP cloud monitoring.

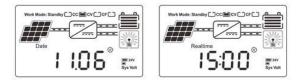

10.CE, RoHS, FCC certifications approved, we can assist clients to pass various certifications.

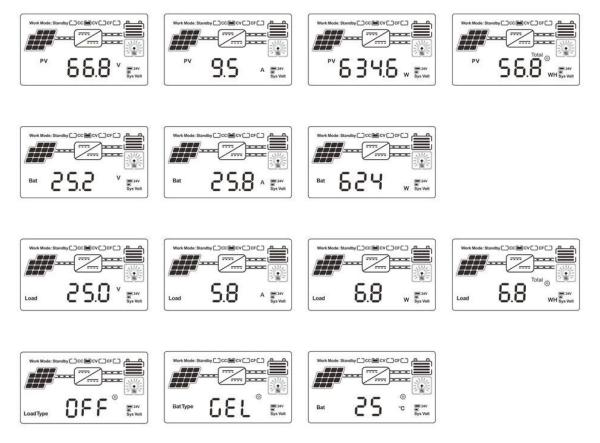

11.3 years warranty, and $3\sim10$ years extended warranty service also can be provided.

Remark:

1. Above is company's standard parameters; any modify please check our official website;

2. We can customize 72V / 96V and other unconventional MPPT controller to special customers, provide OEM and ODM services.
