### Specification of High quality Intelligent Inverter with Built-in MPPT Controller I-P-HPC series

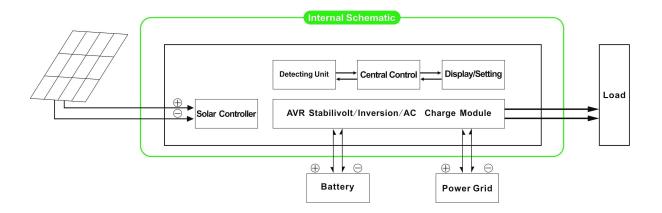

#### Introduction

This series of product is a module design of inverter and built-in MPPT controller, which has the advantages of high conversion efficiency, low power consumption and strong load-carrying ability. With intelligent control, customers can set charging mode, (Utility as complementary power) AC first mode or DC first mode, timed inversion mode and timed utility mode, timed on/off sleep mode. This is the currently the most advanced inverter & controller hybrid in the world.

## **Application**

- 1. Off-grid solar power system
- 2. Solar power system with utility as complementary power

#### **Feature**

- 1. Easy to install. To configure a solar system, customers only need to connect it with solar panels and batteries
- 2. CPU management ,intelligent control modular design, User-friendly LCD display
- 3. Built-in MPPT controller, high charging efficiency
- 4. Low power consumption, high conversion efficiency
- 5. Intellectual multi-function, convenient for customers with different using environment to fully use the solar energy
- 6. External battery connection, convenient to expand back-up power time
- 7. Strong load-carrying ability, low failure rate, easy maintenance and long service life (under proper operation, it may be as long as 5 years)
- 8. Perfect protection: low voltage protection, over voltage protection, overheat protection, short-circuit protection, overloads protection
- 9. CE / EMC / LVD/ RoHS Approvals
- 10. Two years warranty, life-long technical supports

**Function** 

1. Charging function

There are 2 modes as shown bellow:

- 1.1 PV charge the battery, utility will not: when PV and utility are both connected to the machine, only the PV will charge the battery when there is sunlight
- 1.2 Both PV and utility will charge the battery: when PV and utility are both connected to the machine, AC (utility) will charge the battery. In the meanwhile, PV will also charge the battery if there is sunlight.
- 2. Utility as complementary power function

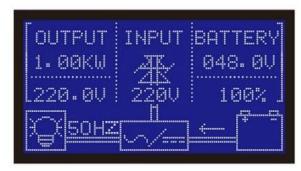

There are 2 kinds of complementary modes, shown as bellow:

#### 2.1 AC first , DC standby UPS mode

When both utility and battery are connected to the machine, utility will supply power to the loads prior to the battery. When utility is cut off, the battery will automatically continue to supply power.

Steps are as follows:

- Step 1: When utility power is available, it will output directly after voltage being stabilized and charge batteries at the same time.
- Step 2: When utility power is cut off suddenly, the inverter will convert DC power to AC power automatically to ensure uninterrupted power supply within 5ms.
- Step 3: When utility power becomes available again, it will automatically transfer to utility supplying power to loads and charge batteries at the same time.

#### **Parameter:**

#### Parameter

Parameter Model	5000W
Rated Output Power	5000W
Peak Power	10000W
Battery (Lead-acid battery□	48V
Charging Parameter	
II NATAO MAADIROTTINALI	PV charge PV charge + utility charge

	Voltage	48V
	Current	40A
	Max PV Input	
MPPT Solar		100V
Utility	PV Charge Efficiency	95%~99%
	Max PV Input Power	2272W
	AC Charge Current	0~15A
	Charge Mode	3-Stage Charging
Inversion par	rameter	
AC Output	Voltage	220V±3% or 230V±3 or 240V±3% or 100V±3% or 110V±3% [optional]
	Frequency	50Hz±0.5 or 60Hz±0.5 [optional]
Output wave type		Pure sine wave output, waveform distortion rate≤3
Overload ability		□120% 1 min, □130% 10s
Power Consumption (under normal working mode)		0.65A
Power Consumption (under sleep mode)		1-6W
Inverter Conversion Efficiency		85%~92%
Utility Mode		
ř	Voltage	220V±35% or 110V+35%[optional]
Utility Mode AC Input	Voltage Frequency	The same as utility
AC Input	Voltage Frequency Voltage	The same as utility 220V±5% or 110V+5%∏optional∏

# Remarks:

The "optional" parameter can be set as per customer's requirement

The above is our standard parameter. Subject to change without prior notice.

We have our own <u>professional inverter</u> and controller R&D team and we provide technical support

# I-P-HPC-Series System

I-P-HPC-Series Inverter+MPPT Solar Controller
